Abstract – The President of Republic of Indonesia issued eight instructions at the Cabinet Forum on January 4th 2016, one if which was “Ensuring the Development of the 10 National Tourism Destinations or 10 New Bali, to meet the 2019 tourism target, the increasing of national income from 120 billion into 240 billion. Bali as one of Indonesia’s prime tourism destination has also taken participation in increasing the income. This can be seen from the support given by Bali government to establish the development program of ten rural tourism in the program of the development of Bali in tourism for the next four years to develop the rural tourism. Based on this, the research was aimed at participating in the development of Human Resource in areas where rural tourism take place to allow the villagers to interact intensively with foreign tourists and give their best service. The participation was the design and development of English training with syllabus, lesson plan and training material as its results. The training put much emphasis on the increase of English communication ability based on the potential resource of Bedulu Village as one of rural tourism. The method of the research was Design and Development, porposed by Ellis and Levy (2010), that consists of several phases in designing and developing English training. It is expected that the output of the study will results in the realization of society service at rural tourism as English training.

Keywords: designing, development, model of English training, tourism village
1. Introduction

The president of the Republic of Indonesia issued eight instructions at the Cabinet Forum January 4th 2016, one of which was “ensure development of the 10 national tourism destination”, or “creating the 10 new Bali”, such as Lake Toba Tanjung Kelayang, Tanjung Lesung, Kepulauan Seribu, Borobudur, Bromo Tengger, Semeru, Mandalika, Labuan Bajo, Wakatobi, Moratai. This is to fulfill the tourism macro target, which are a) increasing the contribution of PDB (WTTC) from 9% (Rp 945.09 trillion into 15%, b) increasing the foreign tourism from 9 million to 20 million and c) increasing domestic tourists from 250 million to 275 million (Subhiksu, 2013). The Indonesian tourism is supported by the cabinet of President Jokowi. It will see its better future.

As one of Indonesia’s major tourism destination, Bali takes participation in the growth of economy of the village society. This can be seen from Bali’s government support to establish the development program of 100 village in the program of the development of Bali in tourism for the upcoming 4 years to develop rural tourism destination (Sastrayuda, 2010).

Community Based on tourism Development like rural tourism can increase the availability of job vacancy from eleven million into 13 million, and therefore overcomes the economical discrepancy due to the local community will have enormous opportunity to work in tourism sector (Mudayen, and Lantum, 2008).

One of training to improve the local community readiness in interacting with foreign visitors is language training, besides other trainings. A research carried on an analysis on HR development of rural tourism participant in Bantul Regency. The research stated that most villagers stated their needs of specific foreign language is English, which reached 92%. The other foreign languages has not yet been determined as a specific need (Sari et al, 2015).

Based on the government’s instruction at Cabinet Forum on January 4 2016, about the enhancement of ten national tourism destinations, and the role of Bali local government to run the program of developing 100 tourism villages in the program of the development of Bali in tourism sector for the upcoming 4 years, this research is aimed at designing and developing the model of syllabus, lesson plan and material of English training for villagers, emphasizing on English for communication at rural tourism.

The result of the study is expected to be beneficial for the people in the tourism village in improving their ability to communicate in English with foreign tourists, English instructors in preparing English training at tourism village, English lecture in doing one of the Tri Dharma Perguruan Tinggi which is the social service activity.

Several previous study which was used as literature review is (Wijayanti et al, 2015) that the research concerns on English training aimed for guide and homestay owner at Munduk village, Buleleng. It was discovered that most of the homestay owner do not have sufficient English ability to provide the best service for foreign tourist. The other research was that dealing with ability in speaking (Tomlison, 2012). The research discovered the lack of ability in speaking English among homestay owners at Kandri tourism village, Semarang. Their education level was assumed to be one factor, as well as their age. Wijayanti then designed a drill and repetition based English training to equip them with readiness to communicate with foreign tourist.
The result was the increase of English ability shown by the homestay owner. Also made available to them was a handbook to assist in tourist service.

The operational definition based on the concept is Design and Development model, which refers to effort by writer, teachers, or students to give input on language and exploit the provided source to maximize the probability of usage (Richey and Klein, 2007), secondly, it is the concept of English training, which is a process to help people obtain skill and knowledge (Ellis and Levy, 2010), in this case is knowledge of English that will give positive impacts on social, education and career (Howard and Major, 2005). Thirdly, it is the concept of rural village, which is a particular effort to make available for visitor some private contact, the feeling of physical environment in rural area and then the tourist is given opportunity to participate in various activities, tradition and local lifestyle. The visitor can experience unique and intangible features which is authentic and original such as local friendliness of several countries and religion, population at certain area has developed a specific way of life (Benard and Viney 1991).

The theory used to analyze and create the design and development of English training at tourism village is Design and Development, which has been developed by several experts. The Design and Development research is said to be a systematical process on design, development and evaluation to construct empirical base to create product and instructional and non-instructional tools as well as a new or refined model owned by the government (Kazar and Mede, 2014). There were six steps of DnD Research (Koyan et al, 2012).

2. Method

This research used a theory proposed by Koyan et al (2012) in designing and developing the training model of English training for people at rural tourism. The subject of the research was the research informant, the local community of Bedulu, Gianyar Bali, after doing problem identification through need analysis with the experts, people representatives and the representative of POKDARWIS at Bedulu Village who participate in the development of a rural tourism. The object of the study is the product of design and development used as the model of English training as foreign language for local community at rural tourism.

The data was collected based on the theory of Design and Development research, proposed by Koyan et al (2012) through the following procedure: a) identifying the problem to motivate the research by using need analysis at Bedulu Village, b) explaining the aim of the research, c) designing and developing the model of English training in the form of syllabus, lesson plan and training material, d) examining the design and development model through FGD with the expert in tourism and English language teaching, e) evaluating and revising the result of design and development model based on FGD, f) communicating the output in the design and development of English training through presentation and publication at scientific journal.
